

Server Support Technician Diploma with CompTIA

A role that combines a passion for IT, with diagnosis and problem solving skills

Get highly valued skills that are always in demand

A Server Support Technician offers a specialist service in developing maintaining, analysing and repairing server IT systems. This diploma will give you the skillset required to be able to handle any request with confidence.

You'll undertake Server+ online training which guides you through how to build and maintain both server hardware and software. You'll also cover the Network+ certification course which will help you learn how to manage and maintain basic network infrastructures. These two, along with the additional courses you decide to undertake, will ensure you meet the industry standard to be a successful Server Support Technician.

The skills you need to get the job and succeed

If you have a flair for IT and are looking to become a Server Support Technician you'll need essential knowledge and understanding of server systems.

This is an excellent diploma which offers great insight and training into specialist IT server support and all that it entails.

What will you get in return?

A Pitman Training Diploma is one of the most prestigious diplomas you can complete from one of the most highly regarded training organisations across the world.

Businesses throughout the UK recognise the Pitman Training name as a sign that you have been trained to the very highest level.

"I found the skills I learnt in this Diploma invaluable. I achieved my Diploma quickly and I'm happy to say I have not been out of work since."

Jason, IT Administrator

CompTIA

Get the Pitman Advantage™

Core Courses

Server+

This course certifies the technical knowledge and skills required to build, maintain, troubleshoot and support server hardware and software technologies.

The exam covers virtualisation, disaster recovery and security procedures. It covers everything from hardware acquisition to preparing for disaster recovery, server virtualisation, and how to recognise and troubleshoot various hardware and software issues that may occur on servers.

This training course will prepare you to pass CompTIA Server+ 2009 exam, SKO-003.

Network +

This training program prepares you to become Network+ certified. Additional to the above you'll also learn how to describe networking technologies, and basic design principles.

Elective Courses** (choose one)

Project Management Fundamentals
Communication Skills for IT Specialists
MTA Server Administration

Administering Windows Server
MTA Database Administrator
Fundamentals

CompTIA

Guideline Learning Time

132 hours flexi study or 5 weeks full-time
(Full-time is based on approx 20-30 hours a week)
