

Windows Server 2012 Administrator

Updating systems and software is key in most IT roles. Our Windows Server 2012 Administrator course, will give you the knowledge required to be able to learn to configure and manage NPS infrastructure, Active Directory, print services and configuration file.

Not only will you learn to deploy, manage and maintain servers, but you will also gain insight into the professional working environment of a server administration – taking an in-depth look at the Server 2012 features and built in functions.

Making your IT career count is key, and having the practical skills and expertise, will place you ahead of the competition.

Get in touch with your local course advisor to find out more.

Designed for

IT Technicians and Server Support staff working within a Windows Server environment.
