

Windows Server 2012 Configuring Advanced Services

Our Windows Server 2012 Configuring Advanced Services course will help consolidate your knowledge of implementing, managing and maintaining a Windows 2012 server.

Through 5 comprehensive sessions covering subjects such as Failover Clustering, Advanced File Services, Dynamic Host Configuration Protocol, and more, you'll gain the theory and practical understanding required to undertake Microsoft exam 70-412*.

The Windows Server 2012 training course is online based, so you can work your training around existing commitments and study at times and places convenient to you. You'll have access to 24/7 online support and also have the support of your centre Course Advisor throughout.

If you successfully achieve exams 70-410, 70-411 and 70-412, you'll earn your Microsoft Certified Solutions Associate Windows Server 2012 certification*.

* Please note vendor exams may need to be arranged separately. Speak to your local Course Advisor for full information.

Designed for

This course is for anyone who is seeking a career as an IT Technician or Server Support Technician, Server Engineer or IT Server Consultant.

Aims and Objectives

This course is designed to give you the skills and understanding to be able to confidently manage a Windows Server environment. You'll also be well placed to go on and undertake the Microsoft exam 70-412.

Prerequisites

Before starting this course it would be preferable to have already achieved your MTA Certification or have previous Professional IT experience within a Windows server environment to ensure you benefit fully from the Windows Server 2012 training.
