

Website Design for Business Award

Want to understand how to design and build a business website?
This award will give you three key courses to study; HTML Fundamentals
or HTML5 Fundamentals, Javascript Essentials and CSS Essentials

Whether you want to learn web design to start a new career or simply want to expand your skillset and be able to confidently liaise with website developers, our Website Design for Business Award will give you all the skills you need.

For any business, having a professional website is essential. A businesses website is the key focal point for brand awareness, customer engagement, customer communication and, quite often, sales.

In the award you'll cover a wide range of topics from planning, design and initial build of a business website, Search Engine Optimisation (SEO) best practice and how to ensure you have the correct SEO in place on a website, through to working with images to produce professional looking graphics for your site.

There are three courses in this award;

Javascript Essentials, CSS Essentials and MTA HTML5 Application Development Fundamentals. This award can be studied completely online so you can choose when and where you would like to study, and as with all our training, it is self-paced so you work through each section in your own time, giving you the ultimate flexibility and ability to build and expand on your website design knowledge.

Aims and Objectives

If you're new to web design and want to learn how to design and build a business website, this is a great place to begin.

Pre-Requisites

There are no pre-requisites required before starting this award.

Career Path

With this award you could help to design, implement or manage a website for your organisation. You could work as a Marketing Assistant and have this as one of your niche skillsets and work closely with external digital partners, alternatively you could use this as a way to start a career as a Web Developer. You can even take that a step further and work self-employed as a Web Designer giving you ultimate flexibility and control over your

CPD Points 80

(Awarded CPD points upon successful completion).

Courses Included

Javascript Essentials

If you're working towards a career as a Web Designer, Java Fundamentals will give you a great foundation and allow you to fully utilise the features of JavaScript language.

or WordPress for Business

Our online WordPress for Business training course is specifically designed for those wishing to learn how to create a business-focused website. You'll learn about designing a site and how to physically create a website.

MTA HTML5 Application Development Fundamentals

This course gives students a strong introduction to HTML5, which consists of three major areas: Hypertext Markup Language (HTML), Cascading Style Sheets (CSS3) and JavaScript. In addition, this course covers the application life cycle, which is important for web developers to know in order to best plan, design, code, test, validate, and deploy HTML5 apps.

CSS Essentials

If you're interested in a career in web design, this course will help you learn how to work with the CSS (Cascading Style Sheets) language. This common language gives you more control over how your web pages look and appear.
