# Advanced IT Security Engineer Diploma with CompTIA

PITMAN TRAINING

Ideal for those already working in an IT environment, this training will focus specifically on the area of IT security.

Core Courses

MTA Security Fundamentals

If you're working towards a career as an IT Security Specialist working with Microsoft Windows servers and network operating systems, the MTA Security Fundamentals course from Pitman Training is the perfect choice.

Security+

This course will help you progress your IT and network administration knowledge and help you understand systems security. Successful completion of this course means you would be well placed to go on and gain the CompTIA Security+ qualification (SY0-501).

CompTIA Advanced Security Practitioner (CASP)

This CompTIA CASP training focuses on providing you with an advanced understanding of security topics as well as theoretical instruction/demonstrations in designing and engineering security solutions.

Elective courses (choose one)

- **Routing and Switching Fundamentals 2013* Series CCNA**
- **Network+**

* Choosing this elective may incur an additional surcharge. Alternative choices are available. Please talk with your Course Advisor. For details regarding professional exam certification please speak with one of our Course Advisors.

CompTIA.

Is this for you?

Our IT Security Engineer Diploma would suit you if you already possess a good level of IT knowledge and wish to expand your skills further in order to specialise in the area of IT security.

This diploma covers an extensive in-depth range of subject matter. Focusing specifically on the area of IT security, you will gain highly detailed knowledge of the tools available to detect and prevent security threats as well as analysing how and why security breaches may have occurred.

You will have the opportunity to gain IT qualifications such as the Microsoft MTA Security Fundamentals certification (exam 98-367) or an expert level CompTIA security certification, Advanced Security Practitioner (CASP).

The training courses are delivered via online format, ensuring that this learning approach is ideal for those who want to further their career prospects, but need to do this around existing life and work commitments. Flexibility of course access is a big plus with this diploma.

Aims and Objectives

This diploma has been designed to augment and enhance existing IT security skills to gain a deeper understanding of cyber security.

Pre-Requisites

Individuals should have a good working knowledge of IT security systems. Ideally you should have at least one years' experience in an IT role and/or have successfully completed the CompTIA A+ certification.

Career Path

Careers in IT can be very rewarding indeed. There is a huge demand for experienced, qualified IT professionals so with time and further training you could aim towards top level roles such as IT Service Manager, Security Analyst, Cyber Security Manager, Head of Technology, Chief Technology Officer or even Director of IT!

Accredited cpd Course

CPD Points 230

(Awarded CPD points upon successful completion).

IT Skills for career success with Pitman Training

If you are looking to work in the IT industry but feel that you have little experience, then our IT courses could be the perfect solution for you.

Pitman Training IT courses will teach you how to: handle essential computer maintenance, manage PCs, operating systems and networks, support LANs and internet access set up, communicate well with all types of users, and project manage IT developments.

Cloud computing has been rapidly spreading across businesses over the last few years, enabling teams to work remotely, changing the way we work.

Having the knowledge required to not only resolve issues in the office, but also being able to assist remote teams with IT challenges is essential, and a skill in high demand by employers worldwide.
